Computer science graduate with hands-on experience building full stack software using Python, FastAPI, React, SQL, and SQLAlchemy. Experienced in REST API development, relational database design, and frontend-backend integration. Seeking a software engineering role where I can contribute across the stack.

PROJECTS

Soccer Prediction App - Jun 2026 to Present

Python • FastAPI • React • SQLAlchemy • SQLite

- Developing a full stack soccer analytics and prediction application with React, FastAPI, SQLAlchemy, and SQLite.
- Designed a modular FastAPI backend with RESTful endpoints, validated response schemas, relational data models, and a dedicated analytics layer.
- Implemented a Poisson based prediction model using league scoring averages and normalized team attack/defense strengths to calculate expected goals and matchup probabilities.
- Built a React frontend with reusable components and route driven views for league standings, team profiles, historical matchups, and prediction results.

Asteroids App - May 2026 to Jun 2026

JavaScript • HTML/CSS

- Built a browser based Asteroids game with vanilla JavaScript and the HTML Canvas API, implementing a real time game loop, vector based movement, collision detection, and wave progression.
- Developed a reusable Vector2 math library and ES6 entity system for thrust, rotation, screen wrapping, projectile motion, and procedural asteroid rendering.

Blackjack App - Apr 2026 to May 2026

Python • Flask • HTML/CSS

- Built a Python/Flask Blackjack web application supporting splitting, doubling down, insurance, wager management, payouts, and a configurable sandbox bankroll.
- Structured game logic around behavior rich domain entities and a separate engine layer, using Flask sessions to serialize and restore game state across HTTP requests.

PROFESSIONAL EXPERIENCE

Parts Advisor - Stohlman Subaru Tysons

Nov 2024 to Present

- Assist customers and technicians in identifying and sourcing appropriate automotive parts using manufacturer electronic parts catalogs, DMS inventory systems, and technical information.
- Manage parts orders, inventory, and procurement while coordinating with service and sales departments to ensure timely fulfillment.
- Troubleshoot part discrepancies and availability issues, balancing multiple requests in a fast paced environment.

Delivery Driver - Dominos Pizza

May 2021 to Nov 2024

- Handled customer service, delivery logistics, order fulfillment, and cash reconciliation across both store and delivery operations.

TECHNICAL SKILLS

Languages

Python • JavaScript • SQL • HTML/CSS

Frameworks & Libraries

FastAPI • React • SQLAlchemy • Flask

Databases & Tools

SQLite • Git • GitHub • pytest • Vitest

EDUCATION

Bachelor of Science in Computer Science

Aug 2019 to May 2023

James Madison University - Harrisonburg, VA
